

RESIDENTIAL LEARNING COMMUNITY

ADDITIONAL QUESTIONS FOR CONSIDERATION

- How will residential life personnel (Resident Scholar, Resident Advisor) participate in the program?
- Will the learning community be open to non-residential students? If so, how?
- Are there more spaces other than a study lounge and computer lab in the facility available for academic purposes? What is the status of a proposal to open more spaces including a faculty office, seminar room, classroom, library, and music room (and residential space generates direct revenue from student rooms)?
- Orientation – How do we shape expectations for the community?
- How can academic advisors participate as part of the learning community team?
- To build a successful learning community program, community must to be created. What partnerships will we have with faculty, students, administration, and staff?
